25. Whidbey Telephone Company		A93
26. Yelm Telephone Company.		A97
Net Operating Income (Total Company Operations)		A101
Summary Tables.		A107

INTRODUCTION

This report presents comparable annual statistics on local exchange telecommunication companies. The statistics presented herein include schedules covering operations for Class A local exchange telecommunications companies (gross operating revenue exceeding $100,000) and Class B local exchange telecommunications companies ($100,000 or less).

The statistics presented in this report are from the company annual reports submitted to the Commission every year as part of the regulatory activities.

The telecommunication companies have started reporting access revenue and expenses from the year 1984. This should be considered while comparing the various revenue statistics.

Table I presents the source and distribution of revenue generated in the Washington State Operations only (not on a total company basis). Net Operating Income, after expenses and taxes are paid, forms about 18-20 percent of the revenue generated in Washington State.

Charts I and II reflect the distribution of revenue both in dollars and relative terms.

Of all the telecommunication companies providing local telecommunication services, the following six companies account for 98 percent of the revenue generated in the state.

MAJOR REVENUE GENERATING TELECOMMUNICATION COMPANIES

(Washington State Operations)

	OPERATING REVENUE 1985 ($ million)	1984 ($ Million)
Pacific Northwest Bell Telephone Company	1,014.7	979.1
General Telephone Company of the Northwest, Inc.	338.3	307.2
Telephone Utilities of Washington, Inc.	46.1	43.5
Continental Telephone Company of the Northwest, Inc.	43.8	42.7
United Telephone Company of the Northwest	40.7	40.2
Ellensburg Telephone Company	8.7	8.8
Total Major Companies	1,492.3	1,421.5
Total Washington State Revenue	1,523.4	1,451.9

Detailed summary Tables II through VI describe the financial statements at the total company and state level of operations. Individual companies tables are given in Appendix.

CAUTIONARY NOTE

As in any attempt to develop continuous and comparable time series data, one of the main problems is to ensure comparability of various data elements. Though comparability is certain at broad group levels, the individual data elements that are added due to changes in accounting systems pose a continuous problem for comparison over time. For instance, in the table, "Net Operating Income and Plant Statistics" access revenues and expenses first appear in 1984. Company mergers cause difficulties with comparability as well. For example, in 1984 Prescott Telephone Company merged with Inland Telephone Company. In order to ensure comparability over time, both companies' data are summed and presented for all years as Inland Telephone Company. Such problems are under investigation and changes and improvements are incorporated as and when they become appropriate.

Readers are requested to send their suggestions and comments to the attention of Dr. S. Ananda Rao, Coordinator, Reports and Statistics, either in writing or by phone (206)753-3006.

INTRODUCTION

Privately-owned electric utilities in Washington State file annual reports with the Utilities and Transportation Commission. As part of its regulatory activities, the Commission reviews these reports and publishes relevant financial and operating statistics. This report presents summarized annual statistics of Washington's three class "A" (gross operating revenues exceeding $750,000) electric utilities for the years 1977 through 1985.

ELECTRIC UTILITIES OPERATING IN WASHINGTON

The three class "A" electric utilities operating in Washington State are Pacific Power & Light Company, Puget Sound Power & Light Company, and The Washington Water Power Company.

According to the revenue generated in 1985, Puget Sound Power & Light Company (PSP) operates entirely within the state of Washington. Nearly two-thirds of Washington Water Power company (WWP) revenue is generated within the state, whereas Pacific Power & Light Company (PPL) operates primarily outside the state with only 15 percent of its revenue generated in Washington State.

GROSS OPERATING REVENUE BY COMPANY
1985 ($ MILLION)

	Total Company	Washington Actual	State Share (%)
Pacific Power & Light Company	1,108.6	165.2	14.9
Puget Sound Power & Light Company	714.1	714.1	100.0
The Washington Water Power Company	328.4	216.6	66.0

MAJOR INFORMATION BLOCKS - ANNUAL REPORTS TO COMMISSION

The annual reports submitted by the electric companies contain a large number of schedules following the system of national accounts. Some of the major and relevant information blocks are:

(1) Balance Sheet - Assets and Liabilities;
(2) Net Income and Retained Earnings;
(3) Operating Revenue and Expenses;
(4) Source and Disposition of Energy;
(5) Sales, Revenue, and Customers; and
(6) Plant and Electric Division Statistics.

Annual statistics by company and blocks are summarized in this report as follows:

FORMAT AND CONTENT OF ANNUAL ELECTRIC REPORT

Financial and operations time series data are presented in tabular form for each of the three electric utilities and for a corresponding state total. Ten tables (six "company totals" and four "Washington State operations only totals"), are included for each Pacific Power & Light Company (PPL) and The Washington Water Power Company (WWP).

Only six tables are included for Puget Sound Power & Light (PSP) Company as this company operates entirely within the state and the "company total" and "state operations total" are identical.

Each table is labeled for ease of use and comparison as follows:

1. Three letters - the letters are an acronym for the company providing the information, i.e., PPL, PSP, WWP.

2. One digit - the number is based on the information blocks above (1 through 6).

3. Blank or "S": The label ends with an "S" if the table reflects Washington State operations only. If the label ends with a digit, the table contains total company information.

For example, table PPL.2 contains net income and retained earnings (Block 2) data for Pacific Power & Light Company and the figures reflect total company operations. However, table PPL.5S contains Pacific Power & Light Company information, for state operations only for Block 5: Sales, Revenue and Customers. If comparative analyses of multiple companies are needed, tables of like number are used, e.g., table PPL.1, table PSP.1, table WWP.1 and ALL.1 for comparisons of total assets and liabilities.

DATA USES/ANALYSIS OF ELECTRIC UTILITIES

Sources of Revenues and Expenditures:

Data presented in the tables can be used in a variety of ways. Table I presents summary data for the state electric utility operations identifying the major sources and distribution of operating revenues and expenditures, both in absolute and relative terms. The detailed source of data for this table is ALL.3S. The statistics presented in Table I are also described in Charts I through IV. Charts I and II present the major sources of revenue both in dollars and percentage terms. Charts III and IV present the distribution of total revenue by sources of expenditures and net operating income.

Source and Disposition of Energy:

Table II presents the various sources and disposition of energy by major categories both in absolute and relative terms. The detailed source for this summary is Table ALL.4S. The major sources and disposition categories are presented in Charts V and VI in megawatt hours. Items such as internal combustion source and energy furnished without charge are not shown in charts as they are not relatively significant.

CAUTIONARY NOTE

Since the publication of the last annual report in November 1985, some of the data presented here have been revised based on the suggestions received from the electric utilities.

In any attempt to develop continuous and comparable time series data, one of the main problems is to assure comparability of various data elements. Though comparability is assured at broad group levels, the individual data elements that are added due to changes in accounting systems pose a continuous problem for comparison.

Some of the data elements in source and disposition of energy used in Table II may not be comparable over all the years 1977-1985.

Readers are requested to send their suggestions and comments to the attention of Dr. S. Ananda Rao, Coordinator, Reports and Statistics either in writing or by phone (206)753-3006.

APPENDIX: ANNUAL STATISTICAL TABLES BY COMPANY AND BLOCKS

COMPANIES:

PPL: Pacific Power & Light Company
PSP: Puget Sound Power & Light Company
WWP: Washington Water Power Company
ALL: Total of all 3 companies

INFORMATION BLOCKS:

BLOCK 1: Balance Sheet
BLOCK 2: Net Income & Retained Earnings
BLOCK 3: Operating Revenue & Expenses
BLOCK 4: Source & Disposition of Energy
BLOCK 5: Sales, Revenues & Customers
BLOCK 6: Plant & Electric Division Statistics

INTRODUCTION

As part of its regulatory activities, the Utilities and Transportation Commission reviews the annual reports submitted by the regulated class "A" gas utility companies operating in Washington State and publishes relevant information on financial and other operations of those utilities. This report presents the annual statistics of Washington's four class "A" gas utilities for the years 1977 through 1985.

GAS UTILITIES OPERATING IN WASHINGTON

The four class "A" utilities that operate in Washington State are: Cascade Natural Gas, Northwest Natural Gas, Washington Natural Gas and The Washington Water Power Company. According to the revenue generated in 1985, (see Table I below) all except Northwest Natural Gas operate primarily within the state.

TABLE I
GROSS OPERATING REVENUE BY COMPANY
1985 ($ MILLION)

	TOTAL COMPANY	WASHINGTON STATE	STATE SHARE (%)
Cascade Natural Gas:	218.6	186.5	85.3
Northwest Natural Gas:	412.2	45.8	11.1
Washington Natural Gas:	390.6	390.6	100.0
Washington Water Power:	128.7	95.0	73.8
Total All Utilities:	1,150.1	717.9	62.4

MAJOR INFORMATION BLOCKS - ANNUAL REPORTS TO COMMISSION

The annual reports submitted by the gas companies contain a large number of schedules following the system of national accounts. Some of the major and relevant information blocks are:

1. Balance Sheet - Assets
2. Balance Sheet - Liabilities
3. Statement of Income and Deductions
4. Statement of Income and Deductions (continued)
5. Statement of Unappropriated Retained Earnings
6. Net Income and Operating Revenue
7. Changes in Financial Position
8. Plant, Production and Sales Statistics
9. Sales Statistics for Gas Operations

Annual data for Blocks 1 through 5 and 7 are provided for total company only; whereas data for Blocks 6, 8 and 9 are provided both by total company and Washington State operations.

FORMAT AND CONTENT OF ANNUAL STATISTICS REPORT

The financial and operations data are presented in tabular form in this report for each of the four gas utilities and for a corresponding state and company total. Twelve tables (nine "Company Totals" and three "State Operations Only Totals"), are included for each Cascade, Northwest Natural, and Washington Water Power Company. Only nine tables are included for Washington Natural Gas since this company operates only within the state and the "Company Total" and "State Operations Only Total" are identical.

Each table is labeled for ease of use and comparison as follows:

1. Three Letters - The letters are an acronym for the company providing the information.
2. One Digit - The number is based on the information blocks above.

*IN COMPLIANCE WITH F.P.C. ORDER NO. 269, DATED AUGUST 1, 1974, REPORTING REQUIREMENTS ELIMINATED GENERATING STATIONS OF CERTAIN MINIMUM CAPACITIES.

3. Blank or "S" - An "S" is found at the end of the label if the table reflects Washington State operations only. If the label ends with a digit, the table contains total company information.

For example, Table CSC.1 contains data on Balance Sheet - Assets for Cascade Natural Gas and the figures reflect total company operations. However, Table CSC.6S contains Cascade Natural Gas information, for state operations only. If comparative analyses of multiple companies are needed, simply find tables of like number, e.g., Table CSC.1, Table NWN.1, Table WNG.1, and Table WWP.1 for comparison of total assets.

DATA USES

Data presented here can be used for a variety of purposes. For example, comparative analyses of changes in financial position for all companies except Washington Natural Gas, whose operations are in-state only, can be made. On the other hand, the average number of gas customers per month for Washington Water Power and Cascade Power Companies' Washington State operations can be compared. Additionally, a single company's share of the total sales of all companies can be computed.

Moreover, an analysis can be made of the overall revenue and expenditure of the total Washington operations as in Table II. The sources of gas revenues indicate that nearly 70 percent of the gas revenues are generated from industrial and commercial sales, whereas the residential sales account for the remaining 30 percent.

A brief look at the expenditures for 1985 (Table II) indicates operating expenses consist mostly of costs of producing manufactured and natural gas. Taxes and depreciation account for about 13 to 14 percent of the total revenues. After allowing

for all the expenses, the net operating income accounts for about 8 percent of the gross operating revenues (See Chart I for distribution of revenue by percent and Chart II for sources of expenditure.)

CAUTIONARY NOTE

Since the publication of the last annual report in October 1985, some of the data presented here have been revised based on the suggestions received from the gas utilities.

As in any attempt to develop continuous and comparable time series data, one of the main problems is to assure comparability of various data elements. Though comparability is assured at broad group levels, the individual data elements that are added due to changes in accounting systems pose a continuous problem for comparison over time. For instance, in the "Statement of Income (Continued)" table for Washington Water Power, Northwest Natural Gas, and the total of all companies note item 8 - Allowance for Borrowed Funds Used During Construction, appears first in 1983. Similarly, in the "Balance Sheet--Liabilities and Other Credits" table, note the section labeled "Other Noncurrent Liabilities" (items 40-43). This section's items first appear for Washington Water Power in 1984. These problems are under continuous investigation and changes and improvements will be incorporated as and when they become appropriate.

Readers are requested to send their comments and suggestions to the attention of Dr. S. Ananda Rao, Coordinator, Reports and Statistics, either in writing or by phone (206-753-3006).

INTRODUCTION

Privately-owned electric utilities in Washington State file annual reports with the Utilities and Transportation Commission. As part of its regulatory activities, the Commission reviews these reports and publishes relevant financial and operating statistics. This report presents summarized annual statistics of Washington's three class "A" (gross operating revenues exceeding $750,000) electric utilities for the years 1977 through 1986.

ELECTRIC UTILITIES OPERATING IN WASHINGTON

The three class "A" electric utilities operating in Washington State are Pacific Power & Light Company, Puget Sound Power & Light Company, and The Washington Water Power Company.

According to the revenue generated in 1986, Puget Sound Power & Light Company (PSP) operates entirely within the state of Washington. Nearly two-thirds of Washington Water Power company (WWP) revenue is generated within the state, whereas Pacific Power & Light Company (PPL) operates primarily outside the state with only 14.3 percent of its revenue generated in Washington State.

GROSS OPERATING REVENUE BY COMPANY
1986 ($ MILLION)

	Total Company	Washington Actual	State Share (%)
Pacific Power & Light Company	1,067.6	152.8	14.3
Puget Sound Power & Light Company	714.8	714.8	100.0
The Washington Water Power Company	302.6	199.2	65.8

MAJOR INFORMATION BLOCKS - ANNUAL REPORTS TO COMMISSION

The annual reports submitted by the electric companies contain a large number of schedules following the FERC Uniform System of Accounts. Some of the major and relevant information blocks are:

(1) Balance Sheet - Assets and Liabilities;
(2) Net Income and Retained Earnings;
(3) Operating Revenue and Expenses;
(4) Source and Disposition of Energy;
(5) Sales, Revenue, and Customers; and
(6) Plant and Electric Division Statistics.

Annual statistics by company and blocks are summarized in this report as follows:

FORMAT AND CONTENT OF ANNUAL ELECTRIC REPORT

Financial and operations time series data are presented in tabular form for each of the three electric utilities and for a corresponding state total. Ten tables (six "company totals" and four "Washington State operations only totals"), are included for each Pacific Power & Light Company (PPL) and The Washington Water Power Company (WWP).

Only six tables are included for Puget Sound Power & Light (PSP) Company as this company operates entirely within the state and the "company total" and "state operations total" are identical.

Each table is labeled for ease of use and comparison as follows:

1. Three letters - the letters are an acronym for the company providing the information, i.e., PPL, PSP, WWP.

2. One digit - the number is based on the information blocks above (1 through 6).

3. Blank or "S": The label ends with an "S" if the table reflects Washington State operations only. If the label ends with a digit, the table contains total company information.

For example, table PPL.2 contains net income and retained earnings (Block 2) data for Pacific Power & Light Company and the figures reflect total company operations. However, table PPL.5S contains Pacific Power & Light Company information, for state operations only for Block 5: Sales, Revenue and Customers. If comparative analyses of multiple companies are needed, tables of like number are used, e.g., table PPL.1, table PSP.1, table WWP.1 and ALL.1 for comparisons of total assets and liabilities.

DATA USES/ANALYSIS OF ELECTRIC UTILITIES

Sources of Revenues and Expenditures:

Data presented in the tables can be used in a variety of ways. Table I presents summary data for the state electric utility operations identifying the major sources and distribution of operating revenues and expenditures, both in absolute and relative terms. The detailed source of data for this table is ALL.3S. The statistics presented in Table I are also described in Charts I through IV. Charts I and II present the major sources of revenue both in dollars and percentage terms.

Charts III and IV present the distribution of total revenue by sources of expenditures and net operating income.

Source and Disposition of Energy:

Table II presents the various sources and disposition of energy by major categories both in absolute and relative terms. The detailed source for this summary is Table ALL.4S. The major sources and disposition categories are presented in Charts V and VI in megawatt hours. Items such as internal combustion source and energy furnished without charge are not shown in charts as they are not relatively significant.

CAUTIONARY NOTE

Since the publication of the last annual report in November 1985, some of the data presented here have been revised based on the suggestions received from the electric utilities.

In any attempt to develop continuous and comparable time series data, one of the main problems is to assure comparability of various data elements. Though comparability is assured at broad group levels, the individual data elements that are added due to changes in accounting systems pose a continuous problem for comparison.

Some of the data elements in source and disposition of energy used in Table II may not be comparable over all the years 1977-1986.

Readers are requested to send their suggestions and comments to the attention of Dr. S. Ananda Rao, Coordinator, Reports and Statistics either in writing or by phone (206)753-3006.

Net Operating Income (Total Company Operations)		A101

INTRODUCTION

This report presents comparable annual statistics on local exchange telecommunication companies. The statistics presented herein include schedules covering operations for Class A local exchange telecommunications companies (gross operating revenue exceeding $100,000) and Class B local exchange telecommunications companies ($100,000 or less).

The statistics presented in this report are from the company annual reports submitted to the Commission every year as part of the regulatory activities.

The telecommunication companies have started reporting access revenue and expenses from the year 1984. This should be considered while comparing the various revenue statistics.

Table I presents the source and distribution of revenue generated in the Washington State Operations only (not on a total company basis). Net Operating Income, after expenses and taxes are paid, forms about 18-20 percent of the revenue generated in Washington State.

Charts I and II reflect the distribution of revenue both in dollars and relative terms.

Of all the telecommunication companies providing local telecommunication services, the following six companies account for 98 percent of the revenue generated in the state.

MAJOR REVENUE GENERATING TELECOMMUNICATION COMPANIES

(Washington State Operations)

	OPERATING REVENUE 1986 ($ million)	1985 ($ million)
Pacific Northwest Bell Telephone Company	978.9	1,014.7
General Telephone Company of the Northwest, Inc.	368.4	338.3
Telephone Utilities of Washington, Inc.	48.4	46.1
Continental Telephone Company of the Northwest, Inc.	46.9	43.8
United Telephone Company of the Northwest	40.5	40.7
Ellensburg Telephone Company	9.2	8.7
Total Major Companies	1,490.3	1,492.3
Total Washington State Revenue	1,523.5	1,523.4

Detailed summary Tables II through VI describe the financial statements at the total company and state level of operations. Individual companies tables are given in Appendix.

CAUTIONARY NOTE

As in any attempt to develop continuous and comparable time series data, one of the main problems is to ensure comparability of various data elements. Though comparability is certain at broad group levels, the individual data elements that are added due to changes in accounting systems pose a continuous problem for comparison over time. For instance, in the table, "Net Operating Income and Plant Statistics" access revenues and expenses first appear in 1984. Company mergers cause difficulties with comparability as well. For example, in 1984 Prescott Telephone Company merged with Inland Telephone Company. In order to ensure comparability over time, both companies' data are summed and presented for all years as Inland Telephone Company. Such problems are under continuous investigation and changes and improvements are incorporated as and when they become appropriate.

Readers are requested to send their suggestions and comments to the attention of Dr. S. Ananda Rao, Coordinator, Reports and Statistics, either in writing or by phone (206)753-3006.

INTRODUCTION

As part of its regulatory activities, the Utilities and Transportation Commission reviews the annual reports submitted by the regulated class "A" gas utility companies operating in Washington State and publishes relevant information on financial and other operations of those utilities. This report presents the annual statistics of Washington's four class "A" gas utilities for the years 1977 through 1986.

GAS UTILITIES OPERATING IN WASHINGTON

The four class "A" utilities that operate in Washington State are: Cascade Natural Gas, Northwest Natural Gas, Washington Natural Gas and The Washington Water Power Company. According to the revenue generated in 1986, (see Table I below) all except Northwest Natural Gas operate primarily within the state.

TABLE I
GROSS OPERATING REVENUE BY COMPANY
1986 ($ MILLION)

	TOTAL COMPANY	WASHINGTON STATE	STATE SHARE (%)
Cascade Natural Gas:	146.2	124.1	84.9
Northwest Natural Gas:	314.9	27.2	8.6
Washington Natural Gas:	314.7	314.7	100.0
Washington Water Power:	85.6	65.3	76.3
Total All Utilities:	861.4	531.3	61.7

MAJOR INFORMATION BLOCKS - ANNUAL REPORTS TO COMMISSION

The annual reports submitted by the gas companies contain a large number of schedules following the system of national accounts. Some of the major and relevant information blocks are:

Block 1: Balance Sheet--Assets and Other Debits
Block 2: Balance Sheet--Liabilities and Other Credits
Block 3: Statement of Income
Block 4: Statement of Income (continued)
Block 5: Statement of Unappropriated Retained Earnings
Block 6: Net Gas Operating Income
Block 7: Changes in Financial Position
Block 8: Plant, Production and Sales Statistics
Block 9: Sales Statistics for Gas Operations

Annual data for Blocks 1 through 5 and 7 are provided for total company only; whereas data for Blocks 6, 8 and 9 are provided both by total company and Washington State operations.

FORMAT AND CONTENT OF ANNUAL STATISTICS REPORT

The financial and operations data are presented in tabular form in this report for each of the four gas utilities and for a corresponding state and company total. Twelve tables (nine "Company Totals" and three "State Operations Only Totals"), are included for each Cascade, Northwest Natural, and Washington Water Power Company. Only nine tables are included for Washington Natural Gas since this company operates only within the state

and the "Company Total" and "State Operations Only Total" are identical.

Each table is labeled for ease of use and comparison as follows:

1. Three Letters - The letters are an acronym for the company providing the information.
2. One Digit - The number is based on the information blocks above.
3. Blank or "S" - An "S" is found at the end of the label if the table reflects Washington State operations only. If the label ends with a digit, the table contains total company information.

For example, Table CSC.1 contains data on Balance Sheet - Assets for Cascade Natural Gas and the figures reflect total company operations. However, Table CSC.6S contains Cascade Natural Gas information, for state operations only. If comparative analyses of multiple companies are needed, simply find tables of like number, e.g., Table CSC.1, Table NWN.1, Table WNG.1, and Table WWP.1 for comparison of total assets.

DATA USES

Data presented here can be used for a variety of purposes. For example, comparative analyses of changes in financial position for all companies except Washington Natural Gas, whose operations are in-state only, can be made. On the other hand, the average number of gas customers per month for Washington Water Power and Cascade Power Companies' Washington State operations can be compared. Additionally, a single company's share of the total sales of all companies can be computed.

Moreover, an analysis can be made of the overall revenue and expenditure of the total Washington operations as in Table II. The sources of gas revenues indicate that nearly 63 percent of the gas revenues are generated from industrial and commercial sales, whereas the residential sales account for 33 percent, and miscellaneous other gas revenues account for 4 percent.

A brief look at the expenditures for 1986 (Table II) indicates operating expenses consist mostly of costs of producing manufactured and natural gas. Taxes and depreciation account for about 12 to 16 percent of the total revenues. After allowing for all the expenses, the net operating income accounts for about 10 percent of the gross operating revenues (See Chart I for distribution of revenue by percent and Chart II for sources of expenditure.)

CAUTIONARY NOTE

Since the publication of the last annual statistics in November 1985, some of the data presented here have been revised based on the suggestions received from the gas utilities.

As in any attempt to develop continuous and comparable time series data, one of the main problems is to assure comparability of various data elements. Though comparability is assured at broad group levels, the individual data elements that are added due to changes in accounting systems pose a continuous problem for comparison over time. For instance, in the "Statement of Income (Continued)" table for Washington Water Power, Northwest Natural Gas, and the total of all companies note item 19 - Allowance for Borrowed Funds Used During Construction, appears

first in 1983. Similarly, in the "Balance Sheet--Liabilities and Other Credits" table, note the section labeled "Other Noncurrent Liabilities" (items 56-59). This section's items first appear for Washington Water Power in 1984. These problems are under continuous investigation and changes and improvements will be incorporated as and when they become appropriate.

Readers are requested to send their comments and suggestions to the attention of Dr. S. Ananda Rao, Coordinator, Reports and Statistics, either in writing or by phone (206-753-3006).
